

Clamp Forklift Parts

Clamp Forklift Parts - Normally utilized as forklift attachments in chemical and petroleum industries, the Drum Clamp, are specifically designed for the safe handling of regular 55-gallon drums. These attachments really enhance productivity in view of the fact that they are capable of handling as much as 4 drums for each load.

Drum Clamps are likewise utilized in the food processing industry and wherever product is stored in drums. The use of this additional part not just incredibly increases operator productivity but enables the individual driving to grip the drums in a secure way for transport. When trying to handle drums making use of traditional forklift blades, much instability occurs while cornering and braking. This common problem can be handled securely and efficiently by making use of the Drum Clamp attachment instead.
