The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction client needs.

With a association consisting of over 90 autonomous dealers, the lift truck group provides quality materials handling equipment to the wide-ranging North American market. Doosan Infracore America Forklift dealers successfully operate in over 220 service and sales locations all through Canada and the U.S. The lift truck product line remarkably includes 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All vehicles are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding lift truck company in the North American marketplace, thanks to their stability in maintaining a high degree of consumer service excellence and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division based in Cleveland has a skilled team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original home-based forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a nationwide equipment expansion project. Initial sales of this industrialized equipment focused on large business communities, the armed services and on state-run firms. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Daewoo started the first domestic lift truck business in 1967, and rapidly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a situation of considerable expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling industry. This project proved highly profitable for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added products for export. In 1993, the company had a international sales system and started exporting models they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international markets.
